## PEDIATRIC GAIT ABNORMALITIES – MUSCULAR DYSTROPHY (4th Series)

#### **Muscular Dystrophy**

Muscular dystrophy is a group of diseases that cause progressive weakness and loss of muscle mass. In muscular dystrophy, abnormal genes (mutations) interfere with the production of proteins needed to form healthy muscle.

**Regular** Condition

Muscular dystrophy

#### **Toe Walking**

Toe walking is a pattern of walking in which a child walks on balls of his or her feet, with no contact between the heels and ground. Toe walking is common in children who are learning to walk. After the age of 2, however, most children outgrow toe walking and begin to walk with a normal heel-to-toe pattern. In very rare cases, continuing to toe walk after age 2 may be a sign of an underlying medical condition. In the vast majority of cases, however, persistent toe walking is "idiopathic," which means that the exact cause is not known. Older children who continue to toe walk may do so simply out of habit or because the muscles and tendons in their calves have become tighter over time. For this type of walking, the term "dancing gait" has also been used, because it resembles the tiptoe gait typical of ballet dancers.

Causes: Typically, toe walking is a habit that develops when a child learns to walk. In a few cases, toe walking is caused by an underlying condition, such as:

• A short achilles tendon. This tendon links the lower leg muscles to the back of the heel bone. If it's too short, it can prevent the heel from touching the ground.

- Cerebral palsy. Toe walking can be caused by a disorder of movement, muscle tone or posture caused by injury or abnormal development in the parts of the immature brain that control muscle function.
- Muscular dystrophy. Toe walking sometimes occurs in this genetic disease in which muscle fibers are unusually prone to damage and weaken over time.
- Spinal cord abnormality

Corrective Measures: Treatment for toe walking depends on a number of factors, including:

- The age of the child
- Whether the child is able to walk flat-footed

Treatment varies according to the cause of toe walking. Few treatments are as follows:

- Achilles tendon stretching exercises
- Orthosis
- Cast plasters
- Another option is the use of botulinum toxin by intramuscular injections into the calf muscles.
- Orthopaedic surgery for more severe cases

Treatment for persistent toe walking often involves a period of casting or bracing to help stretch the muscles and tendons in the calves and encourage a normal gait.

Time management is the process of planning and controlling how much time to spend on specific activities. Good time management enables an individual to complete more in a shorter period of time, lowers stress, and leads to career success.

## **Benefits of Time Management**

The ability to manage your time effectively is important. Good time management leads to improved efficiency and productivity, less stress, and more success in life. Here are some benefits of managing time effectively:

## 1. Stress relief

Making and following a task schedule reduces anxiety. As you check off items on your "to-

do" list, you can see that you are making tangible progress. This helps you avoid feeling stressed out with worry about whether you're getting things done.

## 2. More time

Good time management gives you extra time to spend in your daily life. People who can time-manage effectively enjoy having more time to spend on hobbies or other personal pursuits.

## 3. More opportunities

Managing time well leads to more opportunities and less time wasted on trivial activities. Good time management skills are key qualities that employers look for. The ability to prioritize and schedule work is extremely desirable for any organization.

#### 4. Ability to realize goals

Individuals who practice good time management are able to better achieve goals and objectives, and do so in a shorter length of time.

## List of Tips for Effective Time Management

After considering the benefits of time management, let's look at some ways to manage time effectively:

## 1. Set goals correctly

Set goals that are achievable and measurable. Use the SMART method when setting goals. In essence, make sure the goals you set are Specific, Measurable, Attainable, Relevant, and Timely.

## 2. Prioritize wisely

Prioritize tasks based on importance and urgency. For example, look at your daily tasks and determine which are:

- · Important and urgent: Do these tasks right away.
- · Important but not urgent: Decide when to do these tasks.
- · Urgent but not important: Delegate these tasks if possible.
- Not urgent and not important: Set these aside to do later.

## 3. Set a time limit to complete a task

Setting time constraints for completing tasks helps you be more focused and efficient. Making the small extra effort to decide on how much time you need to allot for each task can also help you recognize potential problems before they arise. That way you can make plans for dealing with them.

For example, assume you need to write up five reviews in time for a meeting. However, you realize that you'll only be able to get four of them done in the time remaining before the meeting. If you become aware of this fact well in advance, you may be able to easily delegate writing up one of the reviews to someone else.

However, if you hadn't bothered to do a time check on your tasks beforehand, you might have ended up not realizing your time problem until just an hour before the meeting. At that point, it might be considerably more difficult to find someone to delegate one of the reviews to, and more difficult for them to fit the task into their day, too.

## 4. Take a break between tasks

When doing a lot of tasks without a break, it is harder to stay focused and motivated. Allow some downtime between tasks to clear your head and refresh yourself. Consider grabbing a brief nap, going for a short walk, or meditating.

## 5. Organize yourself

Utilize your calendar for more long-term time management. Write down the deadlines for projects, or for tasks that are part of completing the overall project. Think about which days might be best to dedicate to specific tasks. For example, you might need to plan a meeting to discuss cash flow on a day when you know the company CFO is available.

## 6. Remove non-essential tasks/activities

It is important to remove excess activities or tasks. Determine what is significant and what deserves your time. Removing non-essential tasks/activities frees up more of your time to be spent on genuinely important things.

## 7. Plan ahead

Make sure you start every day with a clear idea of what you need to do – what needs to get done THAT DAY. Consider making it a habit to, at the end of each workday, go ahead and write out your "to-do" list for the next workday. That way you can hit the ground running the next morning.

Implications of Poor Time Management

Let's also consider the consequences of poor time management.

## 1. Poor workflow

The inability to plan ahead and stick to goals means poor efficiency. For example, if there are several important tasks to complete, an effective plan would be to complete related tasks together or sequentially. However, if you don't plan ahead, you could end up having to jump back and forth, or backtrack, in doing your work. That translates to reduced efficiency and lower productivity.

#### 2. Wasted time

Poor time management results in wasted time. For example, by talking to friends on social media while doing an assignment, you are distracting yourself and wasting time.

## 3. Loss of control

By not knowing what the next task is, you suffer from loss of control of your life. That can contribute to higher stress levels and anxiety.

#### 4. Poor quality of work

Poor time management typically makes the quality of your work suffer. For example, having to rush to complete tasks at the last minute usually compromises quality.

## 5. Poor reputation

If clients or your employer cannot rely on you to complete tasks in a timely manner, their expectations and perceptions of you are adversely affected. If a client cannot rely on you to get something done on time, they will likely take their business elsewhere.
